Full-Stack Software Engineer with 7+ years of experience building web, API, and mobile applications end-to-end in TypeScript. Strong across the entire stack — from React/React Native frontends to Node.js backends, API design, and software architecture. Active open-source contributor, technical mentor, and hackathon enthusiast. I write about software engineering at strdr4605.com.

Experience

- `03.01.2022–PRESENT` **Planable.io** *(acquired by SE Ranking)* | Full-Stack Engineer
  - Part of Platform team (2025-PRESENT) focusing on migration to tRPC, SSO (SAML 2.0) implementation, and investigating container crashes, application performance, and production alerts
  - Built an email analytics pipeline generating and delivering monthly performance reports to **80,000+ users**
  - Worked on **DevOps practices**: commitlint checks, ESLint rules, and **CI/CD** steps to ensure deployment reliability
  - Led the team that developed "Bulk Stories" publishing, conducting code reviews and **increasing by 20%** the usage
  - Integrated Lexical collaborative rich text editor into platform and mobile app; migrated legacy editor for posts/comments with custom conversion functions and incremental DB migrations of **10M+ entities** (blog post)
- `02.11.2020–29.12.2021` **Amazon.com** | Software Engineer (Customer Cloud Security)
  - Developed React Native encryption library securing confidential customer data for mobile platform
  - **Test-driven development** and **continuous integration** practices adopted to eliminate **10 man-hours/week** through E2E
  - Created technical design proposals, UML diagrams, and **software architecture** documentation for security-critical features
- `20.12.2018–04.09.2020` **GoParrot.ai** *(acquired by Square)* | Full-Stack Engineer
  - Managed white-label mobile product portfolio with **7+ applications** across React Native and responsive web design
  - Developed platform using React Native/ReactJS with **40%+ code sharing** between mobile and web
  - Built payment integrations, automation scripts, and **microservices**-based architecture with React + legacy AngularJS

Notable Achievements

- **59 Hackathons** · **30+ open-source projects** · Technical mentor and University lecturer

Projects

- **CoFeed-19**: Built minimalistic client-only feed reader for blog tracking
- **whattime.today**: Share your availability as plain text with timezone conversion
- **why**: A tool to document your package.json scripts
- **mockingcase**: Node.js package with **15+ guided first-time contributors** and TypeScript support

Skills

Languages: TypeScript, JavaScript, SQL
Frontend: React, React Native, Next.js, HTML/CSS, Responsive Design
Backend: Node.js, MeteorJS, tRPC, REST APIs, Express, Microservices
Databases: MongoDB
Testing: Vitest, Playwright, Test-Driven Development (TDD)
DevOps: CI/CD, Docker, Github Actions checks
AI Tools: Claude Code, OpenClaw (Personal AI Agent System)

Education

- `01.09.2019–21.01.2021` Master's Degree in *Computer Science*, **Technical University of Moldova**

Languages

Romanian (Native) · English (Fluent) · Russian (Fluent) · German (Beginner)
